

Group 2 Support Surfaces - Product Classification List

The following product classification list identifies the correct HCPCS code to be used for pressure reducing support surfaces - group 2. This list is not all-inclusive. Questions concerning the coding of items not on this list should be directed to the SADMERC. For support surfaces not on the list, suppliers should use their knowledge of the product and the information in the medical policy to determine the correct code until a determination is published in a future update or they receive a response from the SADMERC to a coding inquiry, **except for codes E0371 and E0372.**

The Coding Guidelines section of the policy states that the only products that may be coded and billed using code E0371 or E0372 are those products for which a written coding determination specifying the used of these codes has been made by the SADMERC. See the Definitions and Coding Guidelines sections of the policy for additional important coding information.

The appearance of a product on this list does not guarantee coverage. This list is not a formal part of the medical policy.
