

Wheelchair Bases - Product Classification List

The following product list identifies the correct HCPCS code to be used for specific wheelchair bases. This list is not all-inclusive. Questions concerning the coding of items not on this list should be directed to the SADMERC. For wheelchairs not on the list, suppliers should use their knowledge of the wheelchair and the information in the medical policies to determine the correct code until a determination is published in a future update or Bulletin or they receive a response from the SADMERC to a coding inquiry.

Some wheelchair base models can be coded using different wheelchair base codes depending on their seat dimensions. Footnotes (A) - (H) define which codes should be used. Footnotes (I) - (N) give other coding guidelines for specific wheelchair bases.

This table addresses adult wheelchair models and some pediatric models. When pediatric wheelchair bases are provided, the miscellaneous wheelchair base codes should be used - K0009 for manual and K0014 for power unless otherwise noted.

The appearance of a product on this list does not guarantee coverage. This list is not a formal part of the medical policy.

<u>Manufacturer:</u>	<u>Product Name:</u>	<u>HCPCS Code:</u>

Note (A): Use K0001 if seat height is greater than or equal to 19 inches and seat width is < 22 inches.

Note (B): Use K0002 if seat height is less than 19 inches and seat width is < 22 inches.

Note (C): Use K0006 if seat width is greater than or equal to 22 inches.

Note (D): Use K0001 if seat width is < 20 inches.

Note (E): Use K0006 if seat width is greater than or equal to 20 inches.

Note (F): Use K0007 if seat width is greater than or equal to 20 inches.

Note (G): Use K0002 if seat width is < 20 inches.

Note (H): Use K0003 if seat height is less than 19 inches.

Note (I): Code the reclining back separately.

If the back is fully reclining, use K0028.

If the back is partially reclining, use K0108.

Note (J): Code the power recline/tilt separately using K0108.

Revised 4/2000
